

01 / INTRO

AI ENGINEER
DESIGN ENTHUSIAST

DIVYANSHU SINGH.

I build intelligent systems with the same care I bring to interfaces, motion, and visual detail.

ENGINEERING × INTERACTION × SYSTEMS

SCROLL TO EXPLORE ↗

02 / APPROACH

I like technology that feels inevitable — powerful underneath, quiet on the surface.

Building intelligent systems that feel inevitable — powerful underneath, quiet on the surface.

03 / WHAT I DO

I build intelligent products where code, design, and curiosity meet. From AI systems and automation to thoughtful interfaces, I turn complex technology into experiences that feel clear, useful, and human.

HOW I WORK

01 AI SYSTEMS

LLM • AUTOMATION • VISION

02

PRODUCT & INTERACTION

INTERFACES • UX • MOTION

03

CREATIVE ENGINEERING

CODE • DESIGN • SYSTEMS

04

EXPERIMENTS

PROTOTYPES • IDEAS • LEARNING

03 / SELECTED WORK

SELECTED WORK

A few systems, experiments, and interfaces — summarized without the case-study wall of text.

01 INTELLIGENT SYSTEM

An AI-first workflow that turns messy inputs into structured decisions.

HOVER TO QUICK VIEW ↗

LLM ORCHESTRATION / EVALUATION / AUTOMATION

02 VISION LAB

Computer-vision experiments packaged as simple, legible product surfaces.

HOVER TO QUICK VIEW ↗

VISION / PYTHON / HUMAN-IN-THE-LOOP

03 AUTOMATION STACK

Small tools that remove repetitive work without adding another complicated dashboard.

HOVER TO QUICK VIEW ↗

APIs / AGENTS / OBSERVABILITY

04 / EXPLORE

THE DETAILS MATTER.

01 AI ENGINEERING LLM pipelines, evaluation, retrieval, agentic workflows ↗

02 PRODUCT THINKING Interfaces that expose complexity only when it helps ↗

03 DESIGN SYSTEMS Typography, rhythm, motion, reusable visual rules ↗

04 EXPERIMENTS Small ideas shipped fast enough to learn from ↗

QUICK VIEW

SYSTEM / 01

A floating preview appears on hover — enough context to decide whether to dive deeper.

OPEN PROJECT ↗

05 / HOW I BUILD

BUILDING, BUT MAKE IT QUIET.

portfolio@ds — zsh

01 \$ whoami
AI engineer • design enthusiast

02 \$ stack
python • typescript • llms • vision

03 \$ principle
reduce friction before adding features

04 \$ motion
arrival → reading → exploration

05 \$ ship
small, observable, reversible

06 / ABOUT

THE OTHER SIDE

Curious about how things work. More curious about how they could feel.

Curious about how things work. More curious about how they could feel. The engineering side keeps me rigorous. The design side keeps me dissatisfied with merely functional answers. I enjoy the space between the two — where systems become experiences.

The engineering side keeps me rigorous. The design side keeps me dissatisfied with merely functional answers. I enjoy the space between the two — where systems become experiences.

The engineering side keeps me rigorous. The design side keeps me dissatisfied with merely functional answers. I enjoy the space between the two — where systems become experiences.

07 / CODE × CREATIVITY

“ Code gives an idea structure. Creativity gives it a reason to exist. The best systems are engineered with precision — and shaped with curiosity. const craft = code + curiosity; </idea>

07 / MOTION LANGUAGE

ANIMATION, WITH A REASON.

Three behaviors define the interface: encrypted arrival, typed voice, generated reading.

01 ENCRYPTED TEXT w3lc0me — to my corner Loading / arrival

02 TYPEWRITER I build things that think. Voice / hero

03 TEXT GENERATE sharpness arrives word by word Reading / about

08 / EXPERIMENTS

SMALL IDEAS. SHIPPED.

01 Hover identity DS. → DESIGNER Signature interaction

02 Saturation scroll DIM → BRIGHT Reading focus

03 Quick view PREVIEW → PROJECT Exploration

04 Dotted glow ATMOSPHERE CTA / footer

09 / CONTACT

HAVE A PROBLEM WORTH BUILDING? LET'S BUILD SOMETHING INTERESTING. Good systems are useful. Great ones are also a pleasure to use. SAY HELLO ↗

© 2028 / DESIGNED • ENGINEERED WITH INTENT

11 / IMPLEMENTATION NOTES

ENCRYPTED Loading screen — scramble unrevealed characters, resolve actual welcome copy on arrival.

TYPEWRITER Hero voice — character-by-character copy with blinking cursor.

TEXT GENERATE About — word-by-word blur/opacity reveal triggered on scroll.

HOVER IDENTITY Brand — DS. expands into DESIGNER on hover, reverses on leave.

SCROLL SATURATION Reading — dim copy resolves to foreground as viewport trigger progresses.

END OF PAGE

MAKE IT FEEL SIMPLE.
